

Systematic Lubrication **Solutions**

CASE STUDY 2005/06

Application : 4 slides on a Paper unwinding machine

Industry : Paper Industry

Problems :

- Lubrication with gas lubricators, 1 lubricator on each slide, setting of 9 months (125cc)
- No control and poor reliability
- Lack of pressure of the gas units

Solution : Installation of MEMOLUB® MEGA with distributor block 4 outlet to lubricate the four slides. Cartridge replacement every 6 months with high performance grease LT2.
